PROJECT DOCUMENTATION:

1. Technical Design Document (TDD)

Target Audience: ServiceNow Admins and Developers.

- **Data Schema:** * **Table:** `u_book` (Fields: Title, Author, ISBN, Status).
    - **Table:** `u_borrow_request` (Fields: Requester, Book, Due Date, Approval State).
- **Workflow Logic:** * **Trigger:** Record Created on `u_borrow_request`.
    - **Key Action:** `Ask for Approval` (Approver: Role = Librarian).
    - **Branching:** If Approved → Update `u_book.status` to 'Borrowed'. If Rejected → Set `u_borrow_request.state` to 'Cancelled'.
- **Scripts:** Documentation of any Business Rules or Client Scripts used for date calculations ($Today + 14\ days$).

2. Functional Requirements Document (FRD)

Target Audience: Project Managers and Stakeholders.

- **Business Rules:** Defines that a user cannot borrow more than 3 books at a time.
- **Approval Matrix:** Specifies that only users with the `u_librarian` role can authorize a request.
- **Notification Triggers:** Lists when emails are sent (Request Received, Approved, Rejected, Overdue).

3. User Manual (Standard Operating Procedures)

Target Audience: Students and Staff.

- **How to Request:** Step-by-step guide on using the **Service Portal** to search for a book and click "Submit."
- **Tracking:** How to view "My Requests" to check the status (Pending vs. Approved).
- **Returns:** Instructions on how the status updates once the physical book is returned.

4. Librarian Admin Guide

Target Audience: Library Staff.

- **Handling Approvals:** How to use the **ServiceNow Agent Mobile App** or the Desktop Dashboard to approve/reject requests.
- **Inventory Management:** How to add new books to the `u_book` table or mark a book as "Lost/In Repair."
- **Reporting:** How to run the "Overdue Books" report to see which users need a follow-up.

5. Maintenance & Support Guide

Target Audience: IT Support Desk.

- **Error Handling:** What to do if the flow shows an error (like the "Mandatory Field" error in your screenshot).
- **Update Sets:** Identification of the Update Set names (e.g., `v1.0_SmartLibrary_InitialBuild`) for future migrations.
- **System Properties:** Where to change the "Default Loan Period" (e.g., changing 14 days to 21 days).
