PROJECT DEMONSTRATION:

1. The Persona Setup

Briefly explain who is involved in the demo:

- **Aman (Student):** Needs to borrow a Java programming book.
- **Priya (Librarian):** Receives the request and approves it via the flow you built.

---

2. Scene 1: The Request (Service Portal)

Action: Open the ServiceNow Service Portal.

- **Show:** Navigate to the "Smart Library" category.
- **Process:** Select the book "Clean Code" from the catalog.
- **Submit:** Click **Order Now**.
- **Visual:** Show the "Request Submitted" confirmation screen.

---

3. Scene 2: The Logic (Workflow Studio)

Action: Switch to the screen from your original screenshot (the **Flow Designer**).

- **Highlight:** Point out the **Ask for Approval** action.
- **Explain:** "Once Aman clicked submit, the flow automatically identified that a **Librarian** needs to review this. It pulled the record data—fixing that 'Mandatory Field' error we saw earlier—and sent a notification."
- **Execution:** Show the **Execution Details** tab to prove the flow is currently "Waiting" for the librarian.

---

4. Scene 3: The Approval (Librarian's View)

Action: Impersonate the Librarian or open the **My Approvals** list.

- **Review:** Show the pending request for "Clean Code."
- **Decision:** Click **Approve**.
- **Result:** Immediately switch back to the **Book [u_book]** table to show that the status has automatically changed from **Available** to **Borrowed**.

---

5. Scene 4: The Notification (Email)

Action: Open the **System Logs > Emails**.

- **Proof:** Show the outgoing email sent to Aman.
- **Content:** "Hi Aman, your request for 'Clean Code' has been approved. Please pick it up by 5:00 PM today."

---

6. Scene 5: The Dashboard (Analytics)

Action: Open a **ServiceNow Dashboard**.

- **Visuals:** Show a "Donut Chart" of book availability.
- **Data:** Show a list of "Overdue Books" to demonstrate how the system tracks time.
